

Innovation & Technology

Cutting Edge Innovation & Technology Team

Greenspoon Marder's Innovation & Technology Group helps entrepreneurs, creators, and investors build, fund, protect, and monetize tomorrow's businesses. Our team members have decades of experience in innovation centers like Silicon Valley, Los Angeles, New York, and now Miami.

We represent clients across the life cycle, from early-stage startups and entrepreneurs, to growing companies, to Billion-dollar unicorns. We leverage our diverse backgrounds and contacts in crypto/NFT, fintech, finance, science, media and entertainment, tax, labor and employment, and intellectual property to help clients win in today's increasingly competitive marketplace.

Our attorneys, patent prosecutors, and technical specialists also have advanced scientific training and are admitted to practice before the U.S. Patent and Trademark Office (USPTO); we understand the science behind your innovations. We also have an extensive network of foreign patent agents with whom we work on international patent matters. Our skilled professionals monitor and manage patent and trademark portfolios to efficiently maintain and enhance matters entrusted to us.

Beyond simply reviewing contracts, our forward-thinking lawyers are also dealmakers who have made key introductions and given essential advice to help clients around the world raise the right money and close the right deals.
